

HABITAT PLANTS

REVEGETATION SPECIES LIST AUTUMN / SPRING 2009

- This list contains the plants we grow in larger quantities, in various tubes, for revegetation type projects.
 - Included is a wide variety of plants for a range of habitats.
 - If you need plants for your project that are not listed here, our catalogue provides a more comprehensive list.
 - Plants are grown and hardened-off outdoors at Liffey – resulting in well hardened stock.
 - Every season we grow a limited number of each species – hoping they will all find a new home.
- When this happens – we are out of stock – temporarily! Sorry!
